

# END 2 END CHANGE KIT

## FOR EVOLUTION SERIES™ CANNING SYSTEMS

Simplify can and end changeover on your Evolution Series canning system to affordably expand your beverage offerings.

End 2 End Change Kits make lid style changeover simple for your Evolution Series system. Accommodate a wide range of standard, sleek and slim body cans with a variety of lid types.

Through the End 2 End kits, your machine adapts to nearly every combination of beverage can diameters, heights and ends in the market to keep your product portfolio fresh and adaptable.

### MULTIPLE CAN + END COMBINATIONS

Adjust between four can end sizes and four can body diameters in a range of heights to explore new package styles that complement your beverages.

### COST-EFFECTIVE DIVERSIFICATION

Add functionality to your machine while keeping costs low. End 2 End Change Kits help you swap easily and quickly between even the most extreme can and end changes.

### READY-TO-SWAP KIT FORMAT

Save time with component kits designed to streamline changeover steps and reduce manual adjustments.
