

# GOOSENECK INFEEED™

## FEED YOUR GOSLING™

The GooseNeck Infeed streamlines can loading for your Wild Goose Gosling™ canning system.

With a direct-mount design that conserves floor space, the GooseNeck adds infeed functionality while keeping your canning system compact.

Accommodating multiple can sizes, the GooseNeck Infeed allows Gosling operators to change can sizes between product runs, with simple adjustment for can body diameter changes. Attaching or detaching the GooseNeck is easy and can be completed in fewer than 5 minutes.

### REDUCED LABOR

Minimize your ongoing infeed labor. The GooseNeck Infeed accommodates 12 cans in the chute, with a gentle back pressure weight to continuously push cans into the machine.

### SINGLE-USER TIME SAVINGS

Providing buffer time between reloading, a single operator can ergonomically load cans while managing other machine functions.

### RELOADING CUE

The GooseNeck's back pressure weight provides the operator an at-a-glance indicator when the chute is ready to reload.

### TECHNICAL SPECIFICATIONS
