

BLUE LIFT

DEPALLETIZING LIFT TRUCK FOR CAN PALLETS

Easily lift pallets of cans for loading into your canning system with minimal investment and floor space.

The Blue Lift manually raises half-height pallets of cans to sweep into your Wild Goose Whale Tail, Infeed Conveyor Table, or other infeed so you can streamline your can-loading labor.

SPECIALIZED FORK DESIGN

Lift and move pallets of cans securely and from any side of the pallet. Designed to accommodate the non-standard dimensions of aluminum can pallets, the Blue Lift features extra-long fork length and extra-wide straddle width to keep the pallet stable while in motion or when feeding cans to the canning line.

COST-SAVING DEPALLETIZATION FOR SMALL SPACES

Roll the Blue Lift in and out of your packaging area and move cans in your facility without committing to large-scale depalletization costs and permanent floor space.

ONE-HANDED OPERATION

Raise and lower your can pallets with a simple hand-crank winch and hold-down device that secures the pallet at the desired height.

TECHNICAL SPECIFICATIONS

DIMENSIONS: 59 in (150 cm) L x 53 in (135 cm) W x 68 in (172 cm) H

FORK LENGTH: 39 in (99 cm)

FORK LIFT HEIGHT: 68 in (172 cm)

LIFT CAPACITY: 400 lb (181 kg)
