

WHALE TAIL INFEED TRAY

FOR EVOLUTION SERIES™ CANNING SYSTEMS

Load cans into your canning system with a simple, cost-effective solution to manual depalletization.

The Whale Tail Infeed Tray attaches directly to your Evolution Series canning line and allows you to load layers of cans from your can pallet into your system without the need for permanent depalletization space or investment.

100-CAN CAPACITY

Sweep up to 100 cans at a time from your pallet to the Whale Tail for continuous infeed while you focus on other packaging tasks.

GRADED TRANSFER

Load the Whale Tail and let it do the rest. With a graded, stainless-steel surface, cans funnel freely from the wide-mouth tray entrance down to a narrow entry point into your canning line conveyor.

ANY-CAN COMPATIBLE

Use the Whale Tail for any size can with no changeover needed. Cans of all heights slide easily without tipping.

TECHNICAL SPECIFICATIONS

DIMENSIONS:

29 in (74 cm) L
56 in (142 cm) W
11 in (28 cm) H

INSTALLED HEIGHT:

52 in (132 cm) H from floor to top of Whale Tail
