WILD GOOSE CANNING SYSTEMS ANNOUNCES LAUNCH OF ITS NEWLY REDESIGNED WEBSITE

Boulder, Colorado April 15, 2015 Wild Goose Canning Systems (WGC) today announced the launch of its redesigned website. The updated site is designed for an optimal user experience, featuring an even greater breadth and depth of information about both canning in general and Wild Goose equipment in particular. Brewers and mobile canners who are in need of product information will now have a rich source of product data from Wild Goose.

“The ever-increasing market demand for Wild Goose Canning Systems has outpaced our ability to respond to every new customer inquiry in the way we would like,” explained Roger Walz, the company’s International Sales Director and Beer Ambassador. “Development of a robust website that can educate our potential customers, address their concerns and deliver references from other happy customers – and do it across mobile platforms – is a benefit both to them and to us.”

Founded in 2003, Wild Goose Canning Systems (WGC) is the brewing industry’s leading canning systems manufacturer. Product innovation, craftsmanship and exceptional customer service are the Company’s hallmark. With engineering, manufacturing and service operations based in Boulder, Colorado, and an emphasis placed on using quality American parts, WGC has nearly doubled its sales every year since the launch of its first canning system.
