### **WILD GOOSE CANNING SYSTEMS ANNOUNCES AVAILABILITY OF THE WGC 600**

f/k/a the "Series 3", the system is capable of producing 88 - 95 CPM

**Portland, Oregon April 15, 2015** Wild Goose Canning Systems' (WGC) today announced shipment of the WGC 600, a major leap ahead for brewers looking for a high CPM system because it pairs speed with the compact footprint that is the signature of WGC machines. The unit is currently on display at the BrewExpo America, booth #2042 during the Craft Brewers Conference 2015.

Wild Goose has been setting new standards for quality in both equipment and service for years, and the new system underscores that commitment. The WGC 600 leads the field with a patented, dual alternating four-head filling stations, two automated lid dropper stations and double WGC-patented seaming stations. The WGC 600 delivers an 88 – 95 CPM production rate and a footprint of 48" by 108" by 93".

"The WGC 600 marks a higher level of automation than we've ever done before. It's appropriate for the larger craft breweries, so we've expanded our market and delivered a canning solution to a bigger audience," said Jeff Aldred, Founder and CEO of Wild Goose Canning. "I also like to think the WGC 600 is 'upwardly cannable'; it'll eat the competition alive."

Founded in 2003, Wild Goose Canning Systems (WGC) is the brewing industry's leading canning systems manufacturer. Product innovation, craftsmanship and exceptional customer service are the Company's hallmark. With engineering, manufacturing and service operations based in Boulder, Colorado, and an emphasis placed on using quality American parts, WGC has nearly doubled its sales every year since the launch of its first canning system.
