**WILD GOOSE CANNING SYSTEMS ANNOUNCES
SALES TEAM EXPANSION**

Reflects Unit Sales Growth in 2015 of 33%

Boulder, CO - In order to better meet growing domestic and international demand for Wild Goose canning lines and ancillary modules, the Company today announced two additions to its sales team. Andrew Ferguson has been named to the newly created position of International Sales Director, and Alan Coon has just been appointed as Wild Goose Canning's first Sales Engineer. Both positions will report to Roger Walz, Vice President of Sales and Beer Ambassador at Wild Goose Canning.

About Andrew Ferguson - Director, International Sales

Andrew has joined the Wild Goose team to develop customer relationships outside of America. Prior to joining Wild Goose, Andrew held roles as General Manager of a brewery that used a Wild Goose canning line, Operations Manager of a Miller Distribution house, beer tour guide in Munich, Germany and started his career stocking shelves at the local liquor store. Having spent over 7 years traveling, working and living in over 30 countries gives Andrew an international sales perspective that will drive Wild Goose into new markets.

About Alan Coon - Sales Engineer

Alan has joined the Wild Goose Sales team to further develop local, regional, and national relationships. Prior to joining Wild Goose, Alan has held various roles as a professional bicycle mechanic, USA certified cycling coach and mechanical engineer. Alan has previous brewing experience and is studying to complete the BJCP and Cicerone certifications. Alan's diverse experience will provide a strong technical background to the Wild Goose sales team.

"We are very happy to be able to increase the level of responsiveness and service to customers interested in our industry-leading canning machines," said Roger Walz. "Moreover, this puts us in an enviable position to take advantage of the ever-increasing pipeline that has opened up to us in Canada, Mexico, Australia, Europe and South America."

Founded in 2003, Wild Goose Canning Systems (WGC) is the brewing industry's leading canning systems manufacturer. Product innovation, craftsmanship and exceptional customer service are the Company's hallmark. With engineering, manufacturing and service operations based in Boulder, Colorado, and an emphasis placed on using quality American parts, WGC has nearly doubled its sales every year since the launch of its first canning system.
